# Product Manager WS4

CONFIGURATION SOFTWARE FOR THE XPRO AND XSMART RANGES

The **Product Manager WS4** is a new user-friendly software designed to manage the Xpro and Xsmart readers.

You can set up the readers as well as update the firmware or new settings you would like to add or remove. The software is available in 7 languages and compatible with Windows operating systems.
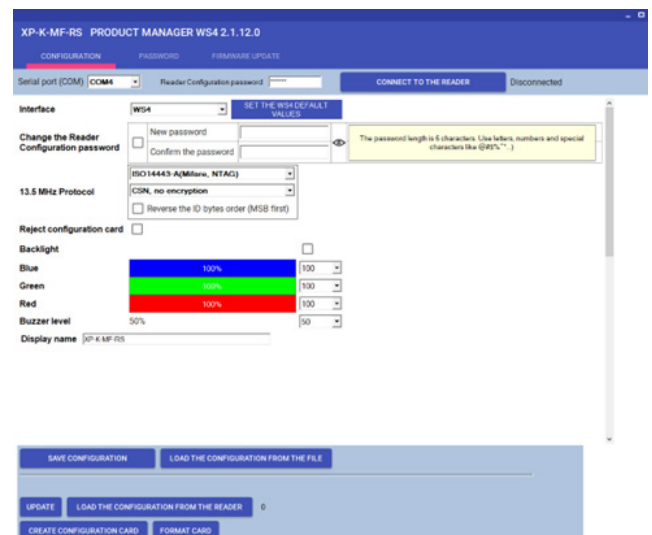

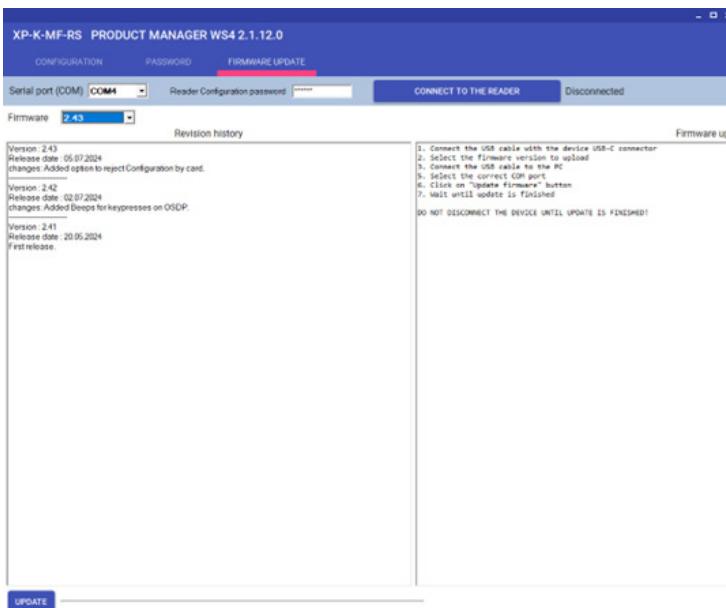

Software for Xpro and Xsmart readers

The new generation of access control readers has been developed to offer more possibilities with fewer references. The reader can be configured to use communication protocol for WS4 and different technologies (EM, Mifare, Keypad, Bluetooth, etc...), besides being upgradable according to the customer's needs.

Thanks to the **Product Manager WS4** software, you can set up the configuration (communication protocols, technologies...) you desire for your readers, as well as update their firmware or the settings afterward if needed.

Main features

Firmware update
Once the reader is connected to the computer, you can check the last firmware available for your reader and you can install it with some easy instructions.

Settings
Once the reader is connected you can select the settings you desire for your XPR reader(s), as the protocol, technology, card types, etc. You can also apply specific settings: OSDP, Wiegand, Templates and Password.
